

I do not want the FCC to weaken NJ Do Not Call Law. Before this was enacted I would receive between 20 to 30 calls per day from telemarketers. I then had to get Caller ID for my phone so I could answer only the calls I wanted. Now I receive only one call per day since signing this list.

If I wanted to do business with any company I have done business with before I would call them, they do not need to be able to call me
